

Please follow the steps below to download and install ArcGIS 10.6 for Desktop.

1. If you do not currently have an earlier version of ArcGIS installed on your machine, proceed to step 2.

If you have ArcGIS version 10.1 or later installed, you do not need to uninstall it before installing version 10.6; the ArcGIS setup package will detect and upgrade your ArcGIS for Desktop software. If you have ArcGIS version 10.0 or earlier installed, please uninstall it using the Uninstall Utility (download below) before installing ArcGIS.

2. Download ArcGIS for Desktop, Microsoft .NET Framework 3.5, and the other files you would like to install. Please note that ArcGIS Data Interoperability, ArcGIS Data Reviewer, and ArcGIS Workflow Manager require ArcGIS for Desktop.
  - When downloading with the Esri Download Manager, you can select and download multiple products. However, only one product should be launched at a time when the downloads are complete.
  - Make sure you have write access to your download directory location as well as your ArcGIS installation directory location, and that no one is accessing it.
3. Install the Microsoft .Net Framework 3.5 Service Pack 1 below.
  - ArcGIS Pro requires [Microsoft .NET Framework 4.5](#) and [Microsoft Internet Explorer](#) version 8 or newer. Before running the installation program for ArcGIS Pro, ensure that your machine meets these prerequisites. [Quick start for ArcGIS Pro](#) provides an overview of installing and setting up ArcGIS Pro and links to detailed resources, including [system requirements](#).
  - ArcMap requires [Microsoft .NET Framework 3.5 SP1](#) and [Microsoft Internet Explorer](#) version 7 or newer. Before running the installation program for ArcMap, ensure that your machine meets these prerequisites. The [quick start guide](#) provides an overview of installing and setting up ArcMap and links to detailed resources, including [system requirements](#).
4. Install and authorize ArcGIS for Desktop
  - Select a destination folder to extract the install files to. If you choose, you can automatically launch the setup after the files have been extracted.
  - When prompted, select **ArcGIS for Desktop Advanced Single Use**.
  - When prompted, accept the default, **I do not wish to authorize any extensions** at this time. The extensions will be authorized automatically.
  - Enter your authorization number: **EVA134335061**.
